

HydroPower Washing.

**Setting the Standard in
thorough Cleaning
of Plastics: The Friction
and Tornado Washers**

The Friction and Tornado Washers are the perfect combination for continuously cleaning heavily contaminated film and rigid plastics using water and mechanical forces. Common impurities such as

- soil and sludge from agricultural film
- paper labels along with dust from post-industrial film and
- food residues found in post-consumer plastics

can be easily removed.

	Friction Washer		Tornado Washer	
Type	FW37-60	FW55-70	MW90-90	MW132-130
Film [kg/h] Thickness > 15–60 µm	500–700	700–1200	500–700	700–1200
Rigid plastics [kg/h] Thickness > 0,5 mm	2000–2500	3000–4000	2000–2500	4000–5000
Rated power Main motor [kW]	37	55	75–90	110–132
